

Students develop a wide range of skills which are highly relevant to the next phase of their life in education, training or employment.

All students complete a work experience placement and feedback from employers is highly complementary of our students' attitude to work and the required skills. Students are very proud of, and are committed to, their school and local community. They contribute to the ethos and culture of the school by earning Reward Points for their participation and involvement in school and community activities, which they then exchange for a range of rewards.

Students are given many opportunities to develop their understanding of global culture. Our seven 'Challenge Days' allow students to experience a range of innovative, exciting and real-world scenarios. These days are often led by external professionals from different career areas who bring alternate perspectives and experiences to student learning. We have provided exciting overseas adventure opportunities in Africa, India, the Far East and Central America in recent years, including regular working trips to help build a school in rural Tanzania. We have increased all students' understanding of the lives, cultures, traditions and religions of people in other countries. The use of modern technologies has greatly improved communication with our partners across the globe.
